

CONSERVE & \$AVE

TOGETHER, WE'LL IMPROVE YOUR BOTTOM LINE

Today's business environment is full of challenges. Worrying about your energy costs shouldn't be one of them. Our commercial and industrial rebates will help you improve the energy efficiency of your business to ensure that you get the most from your energy dollar. We can work with you to evaluate high-efficiency equipment options, assess your potential electricity savings, and determine your rebate and estimated payback. High-efficiency equipment not only lowers your electricity costs, it can also reduce maintenance costs, improve comfort, provide precise control and extend equipment life. Using energy wisely helps us defer the need for additional generation, which helps keep your rates down.

Some high efficiency facts to get you thinking about how your business may benefit from our rebate programs:

Lighting

Today's high-efficiency lighting products can reduce your lighting bill by as much as 40%.

Cooling

New cooling equipment could reduce your energy costs by 20%, while providing increased reliability, quieter operation and use of non-CFC based refrigerants.

Motors

When you install premium-efficiency motors instead of standard-efficiency motors, your energy savings could pay for the price difference in less than two years.

Variable Speed Drives

Variable speed drives not only save energy but also offer more precise control and extend equipment life.

Door Misers®

Anti-sweat heaters in refrigerated glass display cases typically operate continuously, but are needed for only a fraction of the time. Door Misers can save 70-90% of your anti-sweat heating costs.

VendingMisers®

VendingMisers can save 24-36% of your vending machine electricity usage while also reducing maintenance costs and extending machine life.

Custom

Rebates are available for a wide range of energy-saving equipment designed specifically to meet your unique needs.

HOW DO YOU GET STARTED?

Our rebate kit contains everything you need to get started - detailed program fact sheets, qualifying high-efficiency equipment information, and applications/instructions. If you'd like further assistance, just give us a call. We'll walk you through the forms and guide you throughout the process. But don't wait too long...rebate funds may be limited. Please contact us to confirm availability.

We offer access to lamp recycling to help ensure the mercury contained in fluorescent lamps is properly reclaimed.

Remember, we're all responsible for protecting our environment.

Be sure to ask us about our additional products and services!
